

Brownfields 2018 Cleanup Grant Fact Sheet

Chicago Southwest Development Corporation, Chicago, IL

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. The Small Business Liability Relief and Brownfields Revitalization Act of 2002, as amended by the Brownfields Utilization, Investment, and Local Development Act of 2018, was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Chicago Southwest Development Corporation for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the 3.2-acre future Focal Point Community Campus site at 3250 South Kedzie Avenue. The site was previously used as an industrial facility by various chemical and manufacturing companies, and more recently was used for warehousing and distribution tasks. It is contaminated with volatile organic compounds. Grant funds also will be used to conduct community outreach activities.
